Personal Information

Name: Toni Elias | **Address:** Leharstraße 13, 85057 Ingolstadt, Germany

Mobile: +49 1638723355 | **E-Mail:** toni1elias@outlook.com | **Website:** toni1elias.github.io

Summary: Experienced IT Professional, Software Developer, and Business Administrator with expertise in system administration, database management, cloud technologies, software development, project management, finance, and business operations. Demonstrated success in delivering technical solutions across diverse industries, supported by a strong background in both IT and business.

Work Experience

01/2026 - 04/2026 | IT-Professional & Software Developer | Blue Horizon (Amman, Jordan)

- **Software Development:** Developed a user-friendly, responsive full-stack web application that enhanced the user experience and increased team productivity.
- **Technical Documentation:** Created well-structured, indexed technical documentation, catalogs, and manuals that enabled easy navigation, simplified complex concepts, and helped clients and colleagues efficiently utilize applications and their full range of features.
- **Technical Teaching:** Successfully trained colleagues on company software through customized workspace configurations, creating simplified training materials, and repeated coaching, resulting in improved efficiency and user confidence.

01/2022 - 12/2025 | Web Developer & Team Manager | ARATECH (Dubai, United Arab Emirates)

- **Web Development:** Created and maintained numerous custom web applications, ensuring client satisfaction by meeting requirements and delivering visually appealing, responsive interfaces.
- **Project Management:** Ensured the successful completion of multiple new and ongoing projects simultaneously, delivering high-quality work while meeting deadlines.
- **System Administration:** By managing servers, network devices, and computers, I improved system security, performance, and operational stability across the organization.
- **Financial Oversight:** Reduced time inefficiencies and financial waste by creating a comprehensive financial management system to track labor hours, payments, budgets, and leave requests.
- **Human Resources:** Built strong relationships with colleagues, effectively resolved workplace conflicts, and created a positive, collaborative, and productive work environment. Also developed processes to enhance talent acquisition, enabling the recruitment of qualified candidates while optimizing hiring costs and supporting the company's workforce needs.

01/2020 - 12/2021 | IT-Professional & Project Manager | Computer Store (Latakia, Syria)

- **Hardware Technician:** Designed and built stable, high-performance computer systems, while ensuring exceptional client satisfaction through user-friendly solutions. Delivered clean, attractive, and organized setups, both in physical offices and virtual desktops, enhancing the user experience and helping attract and retain current and future customers.
- **Network Infrastructure:** Designed and built requirements-driven networks, delivering high-performance, secure, and stable operations across all network devices, monitoring tools, and security systems.
- **Technical Consulting:** Provided digital solutions to resolve client challenges, increasing profitability, efficiency, and security across business operations.
- **Solar Energy Systems:** Implemented reliable power systems for unstable electrical grids, incorporating clean, hidden cable management.

01/2002 - 12/2019 | IT-Professional & Product Manager | Caterpillar (Latakia, Syria)

- **Systems Administration:** Created and administered the company's website, its custom inventory and financial management systems. Also designed and programmed dynamic product catalogs capable of real-time generation directly from raw database records to improve sales efficiency.
- **Financial Management:** Successfully eliminated long-standing company debt and restored financial stability by cutting waste and increasing sales through expanded marketing efforts.
- **Logistics & Inventory:** Organized and digitized the entire warehouse, accelerating sales operations and eliminating losses from miscounts and over-ordering.
- **Sales:** Enabled online sales and created high-demand product kits from legacy spare parts to unlock new revenue.
